DETAILED ACTION

Election/Restrictions

Previous restriction requirement withdrawn. New restriction requirement given below.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13 and 29-43, drawn to a method of manufacturing, classified in class 445, subclass 3.
- II. Claims 14-28 and 44-53, drawn to a product, classified in class 313, subclass 506.

The inventions are distinct, each from the other because of the following reasons:

Inventions group I and group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case in the method of claims 1, 9, 10, 11 and 13 one could use two or more energy beams pointed at the composite material or an ultra-violet or blue-green laser pointed at the composite material to make the product also for all of these methods the product could just be made already tuned from initial composition without any tuning using energy beams or laser irradiation. In claim 12,

Art Unit: 2879

one could use one or more energy beams pointed at the composite material instead of laser irradiating also the product could just be made already tuned from initial composition manufacture without any tuning using energy beams or laser irradiation. In claim 35, the tuning of the optical properties can be done by energy beams instead of laser irradiating of the composite also the product could just be made already tuned from initial composition without any tuning using energy beams or laser irradiation

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Ann Lee on December 9, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
